IMPORTANT LEGAL AND TECHNICAL INFORMATION FOR THE SELECTION AND CONFIGURATION OF YOUR MOTORHOME

Each Motorhome is only approved for a certain maximum weight on the road, which must not be exceeded under any circumstances when driving. When you select and configure your Motorhome or Van (hereinafter referred to as: "Motorhome"), the technical and legal limits for the weight of the Motorhome are therefore extremely important. These play a decisive role in the configuration, particularly when the additional equipment is being selected (equipment packages, special equipment and options).

The technical and legal requirements for the weight of your Motorhome are regulated in EU Implementing Regulation No. 2021/535 (until June 2022: EU Implementing Regulation No. 1230/2012). This applies uniformly within the European Union. In order to make it easier for you to select and configure your Motorhome in compliance with legal and technical requirements, the key terms and requirements of this regulation are explained in the following, and you are provided with some information that is extremely important when you are configuring your vehicle and selecting your additional equipment (equipment packages, special equipment and options) from the items that are available from the factory. Please read this information carefully before configuring and ordering your vehicle. Our dealers will provide you with additional assistance in selecting and configuring your Motorhome.

1. TECHNICALLY PERMISSIBLE GROSS VEHICLE WEIGHT

The technically permissible gross vehicle weight describes the layout-based maximum permissible weight specified by the manufacturer that your Motorhome is allowed to weigh when loaded (e.g. 3,500 kg, 4,500 kg). This is entered in Part I of the registration certificate. You can find information about the technically permissible gross vehicle weight for each layout in the technical data which is shown in our sales documents (e.g. in the price lists).

Illustration in the price list:

	T 430 KB-LE	
	lightweight 3.5 t Fiat Ducato	comfort 4.2 t Fiat Ducato
Standard chassis	Low frame 35 light	Low frame 40 heavy
Base engine	Diesel 2.2 l	Diesel 2.2 l
Output (kW/HP)	103 / 140	103 / 140
Transmission	6-speed manual transmission	6-speed manual transmission
length / width / height (mm) ^{16) 17) 18)}	6,900 / 2,270 / 2,970	6,900 / 2,270 / 2,970
Wheel base (mm)	3,800	3,800
Double floor height / double floor basement (mm)	170 / 390	170 / 390
Headroom in living area (mm)	1,980	1,980
Rear garage interior height (mm)	1,200	1,200
Door width / height rear garage on passenger's side (mm)	950 x 1,140	950 x 1,140
Door width / height, rear garage on driver's side (mm)	950 x 1,140	950 x 1,140
Technically permissible gross vehicle weight (kg) ²³⁾	3,500	4,250
Weight in running order (kg) ⁷⁾	2,883 (2,739 – 3,027)	2,943 (2,796 – 3,090)
Max. weight of additional equipment in series production specified by the manufacturer (kg) ¹⁴⁾	250	940
Max. towing capacity (kg) ²⁷⁾	2,000	1,800
Max. number of seats with 3-point / 2-point safety belt while driving* ²²⁾	4	4

The technically permissible gross weight of the vehicle (e.g. 3,500 kg) must not be exceeded under any circumstances while driving. If the vehicle exceeds the technically permissible gross weight while driving, this constitutes a regulatory offence which may be punishable with a fine. We therefore urgently advise you to check this before each journey and ensure that you and your vehicle do not exceed the technical-permissible gross weight (e.g. 3,500 kg).

2. WEIGHT IN RUNNING ORDER

The weight in running order corresponds to the (unladen) weight of the vehicle with standard factory equipment (including lubricants, tools, tyre repair kit and a fuel tank that is 90% full) plus a statutory default weight of 75 kg for the driver.

The weight in running order essentially comprises the following items:

- the unladen weight of the vehicle with the main cabin including filled operating fluids such as lubricating grease, oils and coolants;
- the standard equipment, i.e. all equipment items which are included as standard in the vehicle;
- a fresh water tank that is 100% full when driving (fill for driving in accordance with the manufacturer's specifications. You will find the manufacturer's information about filling the vehicle for driving in the sales documents (e.g. in the price lists). This is 20 l or 50 l depending on the model series) and an aluminium gas bottle that is 100% full, weighing 16 kg;
- a fuel tank that is 90% full;
- the driver, whose weight is set at a default weight of 75 kg, regardless of the driver's actual weight.

The weight in running order is therefore the basic configuration of the vehicle model you have selected with standard equipment plus a statutory default weight of 75 kg for the driver. This changes after selecting additional equipment (equipment packages, special equipment, options).

You will find information about the weight in running order for each layout in our sales documents (e.g. in the price lists).

It is important that the value specified in our sales documents for the weight in running order is a standard value which is determined during the type approval procedure and checked by the authorities. It is legally permissible and possible that, due to production-related tolerances, the weight in running order of the vehicle delivered to you will differ from the nominal value specified in the sales documents. The legally permissible tolerance is $\pm 5\%$. The EU legislator has taken into account the fact that there are certain fluctuations in the weight in running order due to fluctuations in the weight of the supplied parts as well as process and weather-related factors. Please take this into consideration when you are selecting and configuring your Motorhome.

Sample calculation illustrating these (permissible) production-related weight deviations:

Weight in running order according to sales documents:	2,900 kg
Legally permissible tolerance of $\pm 5\%$:	145 kg
Legally permissible range of weight in running order:	2,755 to 3,045 kg

The specific range of permissible weight deviations for the weight in running order for each layout can be found in the technical data shown in our sales documents. As a manufacturer, we endeavour to restrict weight fluctuations to the necessary minimum in terms of production technology. Deviations above and below within the legally permissible tolerance range therefore only occur very rarely. However, in spite of constant technical optimization of the production process, these cannot be completely avoided.

In order to ensure that all of the vehicles which are actually delivered comply with the legally permissible tolerance, the actual weight of the vehicle and compliance with the permissible tolerance of $\pm 5\%$ is checked by us as the manufacturer by weighing the vehicle upon completion in the production area at the end of the production line. Your dealer will inform you of the actual weight of your vehicle as measured at the end of the production line. This gives you full transparency about any weight discrepancies that may be present in your vehicle.

3. MAXIMUM NUMBER OF SEATS PERMITTED / WEIGHT OF PASSENGERS

The maximum number of seats permitted while driving is determined by us as the manufacturer during the type approval procedure. The weight of the passengers results from the maximum number of permitted seats. The weight of the passengers is a default amount of 75 kg for each approved seat which we as the manufacturer have provided for the vehicle, regardless of what the passengers actually weigh. This is also a legally prescribed calculation. Since the weight of the driver is already included in the weight in running order, i.e. 75 kg (see section 2), this is not taken into consideration in the weight of the passengers. In a Motorhome with four approved seats, the weight of the passengers is $3 \times 75 \text{ kg} = 225 \text{ kg}$.

The specification of the maximum number of seats permitted refers to the respective vehicle weight in a standard set-up without additional equipment, and specifies the maximum possible number of persons who can be seated while driving.

However, the number of these seats depends on the weight and axle load. It can therefore be reduced by the installation of additional equipment (i.e. by choosing equipment packages, special equipment and options), or depending on the model it may only be achieved by increasing the technically permissible gross vehicle weight and/or omitting additional equipment.

4. ACTUAL WEIGHT AND ADDITIONAL EQUIPMENT

The weight in running order (see section 2) and the weight of the factory-installed additional equipment (equipment packages, special equipment, options) in a specific vehicle are collectively referred to as the actual weight of the vehicle.

You can find information about the actual weight of your vehicle after it has been handed over in section 13.2 of the Certificate of Conformity (CoC), which will be given to you by your dealer when the handover takes place.

Please note that the actual weight which is specified in the Certificate of Conformity (CoC) is also a standard value. Since the weight in running order – as part of the actual weight – has a legally permissible tolerance of $\pm 5\%$ (see section 2 on this), the actual weight can deviate from the specified nominal value accordingly.

According to the legal definition, the so-called additional equipment includes all optional equipment parts not included in the standard equipment, which are fitted to the vehicle by the manufacturer (i.e. ex works) and can be ordered by the customer (e.g. awning, bicycle or motorcycle rack, satellite system, solar system, oven etc.). Information about the individual or package weights of the equipment packages, special equipment and options which can be ordered can be found in our sales documents. Other accessories that are retrofitted after delivery of the vehicle from the factory by the dealer or by you personally are not included in the special equipment in this sense.

5. MANUFACTURER'S SPECIFIED MAXIMUM WEIGHT FOR ADDITIONAL EQUIPMENT AND PAYLOAD

Since the installation of additional equipment is also subject to legal and technical limits, we determine the value of the maximum weight of additional equipment which can be fitted to the vehicle in addition to the standard equipment (e.g. by selecting equipment packages and/or special equipment) for each layout and vehicle. This value must not be exceeded when you are selecting and configuring your vehicle.

The specification of the weight of additional equipment defined by the manufacturer can be found in our sales documents (e.g. in the price lists).

	T 430 KB-LE

Weight in running order (kg) ⁷⁾	2,883 (2,739 - 3,027)	2,943 (2,795 - 3,090)
Max. weight of additional equipment in series production specified by the manufacturer (kg) ³⁴⁾	250	940
Max. towing capacity (kg) ²⁷⁾	2,000	1,800
Max. number of seats with 3-point / 2-point safety belt while driving* ²²⁾	4	4

The maximum weight for additional equipment specified by the manufacturer is intended to ensure that the legally prescribed minimum payload is also actually available for the vehicle payload after delivery of a vehicle by the manufacturer. This means that only a certain amount of additional equipment can be ordered and installed in the factory, in order to leave a sufficient weight allowance available for luggage and other accessories (the so-called payload) without exceeding the technically permissible gross weight.

The payload is calculated by subtracting the weight in running order (nominal value as per sales documents, see section 2), the weight of the passengers (see section 3), and the manufacturer's specified maximum weight for additional equipment, from the technically permissible gross vehicle weight (see section 1).

For Motorhomes, the European legislation prescribes a fixed minimum payload, which must remain for luggage or other accessories which are not installed in the factory. This minimum payload is calculated as follows:

$$\text{Minimum payload in kg} \geq 10 * (n + L)$$

Whereby the following applies: "n" = maximum number of passengers plus the driver and "L" = total length of vehicle in metres (including decimal places).

For a Motorhome with a length of 7 m and 4 approved seats (including the driver), the minimum payload is 10 kg * (4 + 7) = 110 kg, for example.

When you are configuring your Motorhome, please note that the payload must not fall below the minimum.

To ensure that the minimum payload is adhered to, there is a maximum combination of additional equipment which can be ordered for each vehicle model. In the above-mentioned example with a minimum payload of 110 kg, the gross weight of the additional equipment for a vehicle with four approved seats (including the driver) and a weight in running order of 2,900 kg should be a maximum of 265 kg:

3,500 kg	Technically permissible gross vehicle weight
- 2,900 kg	Weight in running order
- 3 x 75 kg	Weight of passengers
- 110 kg	Minimum payload
= 265 kg	Additional equipment

Please note that this calculation is based on the standard value specified in the type approval procedure for the weight in running order, without taking into account the permissible weight deviations for the weight in running order (see section 2). If the maximum permissible value for the additional equipment of 265 kg (in the example) is almost or completely exhausted, an upward deviation of the weight in running order can therefore result in the minimum payload of 110 kg being complied with mathematically based on the standard value of the weight in running order, but without an actual corresponding available payload option.

Here, too, is a sample calculation for a vehicle with four permitted seats, whose actual weighed weight in running order is 1% above the nominal value:

3,500 kg	Technically permissible gross vehicle weight
- 2,929 kg	Actual weight of the vehicle in running order (+ 1% compared to the 2,900 kg specified in the sales documents)
- 3 x 75 kg	Weight of passengers
-265 kg	Weight of additional equipment
= 81 kg	Actual available payload (< minimum payload of 110 kg); in this example, the minimum payload is therefore undershot by 29 kg

In order to avoid falling below the minimum payload, the weight of additional equipment which can be ordered is reduced by the manufacturer depending on the layout. This limit on additional equipment should ensure that the minimum payload, i.e. the legally prescribed free weight for luggage and other accessories in vehicles delivered by the manufacturer is actually available for the vehicle payload.

Due to the production process, the actual weight of the specific vehicle is only ascertained when weighed at the end of the production line, which means it cannot be fully ruled out that in exceptional cases, despite this limit on additional equipment, situations can arise in which the minimum payload is not guaranteed at the end of the production line. In order to ensure the minimum payload in these cases, the manufacturer will collaborate with you and your dealer before delivery of the vehicle to check if the vehicle's technically permissible gross weight has been increased, if the permitted number of seats has been reduced, or if additional equipment has been removed to reduce the weight, so that you are delivered a vehicle that provides you with the legal minimum payload. The specification of the weight of additional equipment defined by the manufacturer can be found in our sales documents (e.g. in the price lists.).

310605	90-litre fuel tank	120	23
410281	Driver's cab exterior colour Black Metallic	1,1	-

The extra weight of additional equipment (all equipment parts not included in the standard equipment) increases the actual weight of the vehicle (= weight in running order plus the selected additional equipment) and reduces the payload. The specified value shows the additional weight compared to the standard equipment for the respective floor plan. The total weight of the selected additional equipment (equipment packages, special equipment and options) must not exceed the maximum weight for additional equipment specified by the manufacturer.

6. HOW TOLERANCES IN THE WEIGHT IN RUNNING ORDER AFFECT THE PAYLOAD

Regardless of the minimum payload, you should also note that unavoidable production-related fluctuations in the weight in running order have an effect on the remaining available payload:

If you order our example vehicle (see section 5) with additional equipment with a gross weight of 150 kg, the calculated payload is 225 kg based on the default value for the weight in running order. Due to the tolerances, the payload that is actually available may deviate from this value and may be higher or lower. If the weight of your vehicle in running order is about 1% higher than the weight specified in the sales documents, the available payload is reduced from 225 kg to 196 kg:

3,500 kg	Technically permissible gross vehicle weight
- 2,929 kg	Actual weight of the vehicle in running order (+ 1% compared to the 2,900 kg specified in the sales documents)
- 3 x 75 kg	Weight of passengers
- 150 kg	Additional equipment ordered for the specifically configured vehicle
= 196 kg	Actual available payload

In order to ensure that the calculated payload is actually available, you should therefore take into account the possible and permissible tolerances for the weight in running order as a precaution when selecting and configuring your vehicle. In addition, we strongly recommend that the loaded Motorhome is weighed on a non-automatic weighing scales before each journey and that the technically permissible gross vehicle weight and the technically permissible gross weight on the axle are complied with, taking into account the individual weight of the passengers.

More information available online!

www.malibu-carthago.com

MORE OF EVERYTHING AS STANDARD

MOST STORAGE SPACE IN ITS CLASS

- Double floor with huge, heated storage compartment, usable height up to 55.5 cm, external access via several large hatches (depending on model)
- Central through-loading space (interior height 22 cm) with extra-low storage compartment (usable height 46 cm) depending on model
- Underfloor heating effect: Heat storage in the insulated double-floor

PREMIUM BODY CONSTRUCTION

- Chassis with ultra-sturdy connections via form-fitted and bonded frame members (roof-wall / floor-wall)
- Protection from hailstones, stone chippings and moisture thanks to GRP on roof and underside of floor
- Exclusive side wall / curved roof
- 10-year water ingress guarantee as standard
- Easy to repair in the event of damage thanks to 4-part rear panel frame and segmented side skirts (depending on model)

OUTSTANDING DRIVER'S CAB VISIBILITY CONCEPT (A-CLASS)

- Dashboard slopes steeply towards front, low panoramic windscreen for early view of road surface
- Top test result for view of road surface after just 2.77 m in Fiat Ducato

HIGH-QUALITY FURNITURE DESIGN

- Double-connection technology: Furniture is screwed together and mortised
- High-quality and robust metal hinges

Shower insert in same design as living area floor, removable for showering	X	X
Shower head height-adjustable on chrome rail	X	X
Mini-Heki skylight in washroom	X	X
Roof light in shower room	X	X
Wash stand base unit with toilet roll holder, mirrored storage cabinet	X	X
Sleeping		
Drop-down bed above driver's cab (Malibu A-Class)		
Slatted frame and high-quality mattress	X	-
Extra-low positioning of the bed: Access via side seat	X	-
Wobble-free support when lowered, bookshelf and LED spotlights	X	-
Dividing curtain between drop-down bed and living area	X	-
Fixed beds in rear		
7-zone, high-quality cold foam mattress	X	X
Two-part heated and ventilated slatted frame	X	X
Mini-Heki skylight	X	X
Raisable head section	X	X
Lengthways single beds		
Fixed access steps (lightweight 3.5 t models)	X	X
Pull-out access steps including lying surface extension and additional cushion (comfort 4.2 t models)	X	X
All-around overhead storage cabinets	X	X
Wardrobes beneath the beds, lowered into the double floor (model-dependent), with lift function and divided mattress	X	X
Shelves for wardrobe under lengthways single bed (comfort 4.2 t models)	X	X

	AC	LP
On-board utilities		
Water		
Fresh water and waste water tank in heated double floor, cleaning opening in scooter garage or via living area floor hatch	X	X
Central water drain in central double floor	X	X
Low-maintenance pressurised water pump system	X	X
Gas		
External low-level gas bottle compartment (450 RB-LE, 460 KB-LE, 490 RB-LE, 500 RB-QB models)	X	X
441 KB-LE, 430 KB-LE models: Gas bottle compartment in rear area, accessible via separate gas compartment door	X	X
Holds 2 x 11 kg gas bottles	X	X
Gas stopcocks in kitchen area	X	X
Electrical system		
18 A automatic charger, electronic control, automatic switch-off when voltage too low, including starter battery charging	X	X
Electrical centre under driver's seat (Fiat Ducato) or in double floor behind driver's seat (Mercedes-Benz Sprinter)	X	X
1 x 80 Ah gel battery under driver's seat (Fiat Ducato) under passenger's seat (Mercedes-Benz Sprinter)	X	X
On-board control panel behind technical panel above main entrance door	X	X
230 V sockets in kitchen, bathroom and entrance area	X	X
12 V socket in driver's cab	X	X
Double USB socket in driver's cab	X	X
Living area lighting		
Numerous LED spotlights above L-shaped lounge seating area, integrated in the ceiling canopy, rear bed area	X	X
Light control via main switch in entrance area	X	X
Work light and ambient lighting can be switched on separately	X	X
Heating technology		
Hot air outlets in living area, double floor, scooter garage and main cabin door entrance	X	X
Dashboard with targeted heating with panel heating effect (Malibu A-Class)	X	-
Hot air outlets in driver's cab, dashboard front, door entrance (Malibu A-Class)	X	-
Underfloor heating effect due to heated climate storage double floor	X	X

Malibu Motorhomes

Malibu Motorhomes come in two different weight and equipment variants.

For you, the customer, this provides you with clarity in terms of finding a model that suits your needs.

If you prefer lightweight vehicles that meet the requirements of the 3.5 t class, and that can be driven with an EU category B driver's license, our **lightweight 3.5 t models** are the perfect choice. These combine innovative lightweight construction with Malibu's unique features.

However, if you not limited to the 3.5 t weight class and want the maximum level of comfort, then our **comfort 4.2 t models** are just what you need. The huge payload reserves and unparalleled comfort of these fully-equipped Motorhomes leave nothing to be desired.

To make choosing the right model as easy as possible, you can find an explanation of the differences in equipment between the lightweight 3.5 t and the comfort 4.2 t models below.

lightweight 3.5 t	comfort 4.2 t	Optional for lightweight 3.5 t
Fiat Ducato base vehicle		
Fiat Ducato with technically permissible gross vehicle weight of 3,500 kg	Fiat Ducato with technically permissible gross vehicle weight of 4,250 kg	
Standard 60-litre fuel tank	Standard 60-litre fuel tank, 90-litre fuel tank available in Chassis package	○
Mercedes-Benz Sprinter chassis		
Mercedes-Benz Sprinter with technically permissible gross vehicle weight of 3,500 kg with malibu light AL-KO low frame	Mercedes-Benz Sprinter with technically permissible gross vehicle weight of 4,200 kg with malibu AL-KO low frame	
Standard 65-litre fuel tank	Standard 60-litre fuel tank, 92-litre fuel tank available in Chassis package	○
Body		
Double floor exterior access via storage compartment hatch in front of XL main cabin door (Depending on model)	Double floor exterior access via storage compartment hatch in front of XL main cabin door and additional, lowered exterior storage compartment behind XL main cabin door (Depending on model)	○
Driver's cab		
Overhead storage cabinet at side with front flap below drop-down bed on driver's side	Overhead storage cabinet at side with front flap below drop-down bed on driver's and passenger's side	
Washroom		
Large washroom with modern countertop washbasin, large wall mirror and additional storage cabinet (only 450 RB-LE model)	Large washroom with extra-large, all-around mirror cabinet and large, flush-mounted washbasin	
Wash stand base unit with toilet roll holder	Wash stand base unit with toilet roll holder and laundry basket*	
Kitchen		
3-ring hob with one-piece or two-piece glass cover (depending on model), enamelled wire pan support and stainless steel base**	3-ring hob with one-piece or two-piece glass cover (depending on model), cast iron pan support and glass base**	
Multifunctional sink cover including wall holder for worktop extension	Multifunctional sink cover including wall holder for worktop extension and chopping board function	●
Sleeping area incl. wardrobes		
Convenient access step for lengthways single beds	Pull-out lightweight access steps including lying surface extension with additional cushion for lengthways single beds	●
Wardrobes beneath lengthways single beds, lowered into the double floor, with lift function and divided mattress	Wardrobes with shelf beneath lengthways single beds, lowered into the double floor, with lift function and divided mattress	●
Utilities		
90 Ah lithium-ion battery with battery computer, included in Comfort package	80 Ah gel battery as standard	

* Laundry basket only available with luxury bathroom layouts

** Hob cover two pieces in corner kitchens, single piece in side kitchens

○ = special equipment ● = included in package

The prices are recommended retail prices. Because of the cost and price developments on the procurement markets, which are extremely volatile and can therefore not be calculated over the long term, we reserve the right to both adjust our prices for our dealers during the year, and adjust our recommended retail prices accordingly. Of course, we endeavour to offer reasonable prices to the market at all times. You are advised to consult your dealer about the price that applies at the point in time when the contract is concluded.

Footnotes

Additional legal and technical information concerning vehicle weights / weight tolerance in running order

- 7) In accordance with EU Implementing Regulation No. 2021/535, the Weight in running order corresponds to the (unladen) weight of the vehicle with factory-installed standard equipment (including lubricants, tools, tyre repair kit) plus driver (75 kg), 90% full fuel tank, fresh water tank when driving (20 l), 100% full aluminium gas bottle. The weight specified by the manufacturer for additional equipment is basically dependent on the Weight in running order, and is reduced by installing additional equipment (equipment packages, special equipment). Please note that the actual weight which is specified in the Certificate of Conformity (CoC) is also a standard value. Since the Weight in running order – as part of the actual weight – has a legally permissible tolerance of $\pm 5\%$, the actual weight can deviate from the specified nominal value accordingly. Detailed information can be found on page 2, no. 2.
- 14) When selecting and configuring your vehicle, the maximum weight for additional equipment specified by the manufacturer must not be exceeded. The maximum weight for additional equipment specified by the manufacturer is intended to ensure that the legally prescribed so-called minimum payload is actually available for additional loading after the vehicle has been delivered by the manufacturer. This means that only a certain amount of additional equipment can be ordered and installed in the factory, in order to leave a sufficient weight allowance available for luggage and other accessories (the so-called payload) without exceeding the technically permissible gross vehicle weight. Detailed information can be found on page 4, no. 5.
- 22) The specification of the maximum permissible number of seats refers to the respective vehicle weight in a standard set-up without additional equipment, and specifies the maximum possible number of persons who can be seated while driving. The number of seats also depends on the weight and the axle load. It can therefore be reduced if additional equipment (equipment packages, special equipment) is installed, or it may only be achieved if the vehicle load is increased. With additional approved seats (c-tourer only in conjunction with increased load option) the minimum payload per person increases by 85 kg, and the maximum weight for additional equipment reduces at the same time. Detailed information can be found on page 3, no. 3. With the optional 5th seat, the double floor through-loading storage compartment is slightly restricted, and the upholstery is not covered in the same fabric as the living area.
- 23) The technically permissible gross vehicle weight describes the layout-based maximum permissible weight specified by the manufacturer that your Motorhome is allowed to weigh when loaded (e.g. 3,500 kg, 4,500 kg). The technically permissible gross weight of the vehicle (e.g. 3,500 kg) must not be exceeded under any circumstances while driving. Detailed information can be found on page 2, no. 1.
- 27) The maximum towing capacity depends on the total towing weight of the vehicle. Fiat Ducato 6,000 kg; Mercedes-Benz Sprinter 5,880 kg.
- 33) Truma DuoControl CS option with crash sensor, automatic switchover and de-icing function. In the basic configuration when calculating the weight in running order, only one 100% full aluminium gas bottle at 16.5 kg is taken into consideration. The "DuoControl CS with crash sensor" (automatic switchover and de-icing function), which is available as an option or in the equipment package, can in principle also be operated with one connected gas bottle. When connecting and using a second gas bottle, the remaining load capacity of your vehicle will be reduced by 16.5 kg if an aluminium gas bottle is used. Steel gas bottles are around 5 kg heavier.

General

- 1) In the event of unfavourable conditions, manual readjustment of the air conditioning system may be necessary.
- 2) Pioneer multimedia system with touchscreen in driver's cab, Wireless Apple CarPlay / Android Auto, Bluetooth, USB interface for connecting portable devices (Low-Profile: monitor function for optional reversing camera).
- 3) Truma Combi 6E option not possible in conjunction with Alde hot water heater option.
- 4) The optional lithium-ion batteries replace the standard gel battery/batteries. Battery status indicator accessible via free app and touch display.
- 5) TV with receiver and DVB-T2 tuner (incl. USB, HDMI, full HD).
- 6) The Midi-Heki above the seating area is omitted if the electric central drop-down bed option is selected. Headroom beneath central drop-down bed: 1.84 m.
- 8) The foot pedal for adjusting the table is omitted in the option with the lounge seating area with a lowerable table top which can be converted into a sleeping berth. The table adjustment lever is beneath the table top in this model.
- 9) When selecting a driver's assistance package, there is a cut-out for the camera casing in the camera position area (top centre) with the driver's cab blackout system.
- 10) Mini-Heki skylight above kitchen area not possible in conjunction with the electric extractor hood option.
- 11) Mounting depends on available roof area; if necessary, standard components may be omitted or installed in a different location. Height of Teleco structure on roof approx. 130 mm Teleco Flatsat Classic 85 satellite system not possible in conjunction with pre-wiring for TV connection in rear bed area.
- 12) Radio/moniceiver with touchscreen in driver's cab, Bluetooth and USB interface for the connection of portable devices (Low-Profile: monitor function for optional reversing camera).
- 13) Incl. connecting kit: Coaxial cable, antenna socket, 12 V socket. Additional TV connection or pre-wiring for TV connection in rear not possible in conjunction with Teleco Flatsat Classic 85 satellite system.
- 15) The load-bearing capacity in the scooter garage is reduced by 100 kg if the Pedelec scooter garage option is selected.
- 16) Total vehicle length is the measurement between the front skirt and the rear end.
- 17) Total vehicle width is the measurement from exterior wall to exterior wall (wheel arches on the side, approx.: + 70 mm).
- 18) Height changes depending on installation of certain optional accessories. The vehicle height with Fiat light/heavy chassis can differ by 50 mm.
- 19) Child seats with restraint systems must not be installed on the passenger's seat.
- 20) Position of 32" Smart LED TV above L-shaped lounge seating area.
- 21) The specified fresh water volume includes the volume of the boiler.
- 24) Malibu Low-Profile: Reversing camera system in conjunction with Fiat 10.1" multimedia system is digital instead of analogue.
- 25) The charge booster is incorporated between the alternator and the starter and also the habitation battery, and ensures that the alternator generates power until the batteries are charged.
- 26) In Fiat Ducato f35 only possible in conjunction with 16-inch steel wheels or 16-inch alloy wheels.
- 28) Drawers omitted in kitchen base cabinet (quantity depends on model). Dimensions of oven in kitchen unit (in mm). 441 KB-LE, 430 KB-LE models: Height 307 x width 527 x depth 409; 460 KB-LE, 490 RB-LE 500 RB-QB layouts: height 445 x width 445 x depth 490. Not possible in conjunction with Tec-Tower.
- 29) In Low-Profile 460 KB-LE model, the Alde hot water heater option is not possible in conjunction with the central drop-down bed option.
- 30) Position: Lounge seating area (230 V, USB), sleeping area rear overhead cabinet (230 V, USB), scooter garage (230 V).
- 31) Alde heat exchanger for heating the living area using engine heat while driving, incl. engine preheating function.
- 32) Malibu table and chair set option, consisting of two camping chairs incl. Malibu logo and a table.
- 34) Push-in and transport system option for 2 Pedelecs/e-bikes, only in conjunction with Pedelec scooter garage.
- 35) "Skyview" skylight with designer roof liner option, including indirect LED lighting above driver's cab. Not possible in conjunction with the central drop-down bed option.
- 36) Fiat Ducato f40 option, including 16-inch steel wheels.
- 37) 4-cylinder engine with 2.2 l. 140 HP engine: 350 / 380 Nm, engine 180 HP: 380 / 450 Nm.
- 38) Speaker in driver's cab (2x) and L-shaped lounge seating area (2x).
- 39) Multi-functional steering wheel option only possible in conjunction with radio or multimedia system option.
- 40) Tec-Tower 153 l fridge combination option, with door opening at both sides, separate freezer compartment and gas oven. Not possible in conjunction with gas oven in kitchen base unit.
- 41) Malibu world of sleeping & décor set, consisting of one or three decorative cushions (depending on model), a jacquard bed throw with woven Malibu logo and a fitted sheet set to match the respective layout.
- 42) Reversing camera system with single lens and 7" colour monitor integrated in side of dashboard.
- 43) It is recommended to order the gas filter in conjunction with the Truma DuoControl CS option, since the manufacturer of the Truma DuoControl invalidates the warranty if the gas pressure regulator and valves become defective or damaged because of oil or other foreign materials in the liquid gas.
- 45) 24" Smart LED TV incl. TV bracket, speakers and integrated contact switch wirelessly integrated in television wall for sleeping area (only in conjunction with connecting kit)
- 46) Tow bar option not possible in conjunction with Pedelec scooter garage option.
- 47) State-of-the-art multimedia system with 10.1" display, Bluetooth connectivity with audio streaming and hands-free function, smartphone integration via Android Auto or Apple CarPlay, USB interface for connecting portable devices.
- 48) Digital instrument cluster with colour display for optimal pairing with the Fiat 10.1" multimedia system for display of 3D navigation maps and driver's assistance systems.
- 50) The collision braking system automatically triggers braking in the event of a collision in order to prevent or lessen the effects of a possible secondary collision.
- 52) TV pre-wiring in 450 RB-LE layout only in conjunction with 32" TV wall bracket, 180° rotatable in entrance area.
- 53) SOG toilet ventilation via roof flue. In 450 RB-LE layout, SOG toilet ventilation via floor vent.
- 54) Battery status indicator accessible via free app with 18 A automatic charger. Cannot be combined with additional lithium-ion battery.
- 55) The option of omitting the high-quality mattress for drop-down bed will reduce the vehicle weight. The slatted frame is left in place and can be used as a shelf space. Not available in conjunction with option to omit the drop-down bed.
- 56) Option recommended for Mercedes-Benz A-Class models. If this option is not chosen, the passenger's seat in these models is around 45 mm lower than the driver's seat.
- 57) Multimedia system (Mercedes-Benz: MBUX 10.2" display; Fiat: 10.1" display), Bluetooth connectivity with audio streaming and hands-free function, smartphone integration via Android Auto or Apple CarPlay, USB interface for connecting portable devices. Mercedes-Benz: vehicle weights and vehicle dimensions cannot be stored separately in the navigation system.
- 58) Voltage transformer only in conjunction with second habitation battery (gel) or lithium.

- The price information shown includes the legally applicable rate of VAT of 19 % and excludes shipping and transport costs.
- Some vehicles are shown with special equipment which is available at extra cost.
- Some special equipment cannot be installed in all models. Your Malibu dealer is happy to inform you about installation and technical details for your desired model.
- This information is subject to price, design and equipment modifications and also errors. The details relating to delivery contents, appearance and performance represent the available information at the time of printing.
- If our suppliers change product descriptions during the season, we reserve the right to deliver a part type of equivalent value.
- Price, dimensions and weights subject to change. The statutory VAT deduction applicable at the time of delivery shall apply. All prices are non-binding recommended prices ex works. In the case of price adjustments by sub-contractors or base vehicle manufacturers, the prices will be modified accordingly.
- Mattress sizes can differ from the specified bed dimensions.
- The installation of optional extras can result in loss of storage space.
- Prices for optional extras apply to ex works installation (not retrofitting). These extras must be ordered in good time before the vehicle goes into production. For information on this, please contact your Malibu dealer directly.
- The mounting of solar energy and satellite systems depends on the available roof area.
- Any change to the factory condition of your vehicle can negatively affect driving quality and safety.
- Any structural alteration to the vehicle renders liability claims void. The same applies if the customer makes changes to the paintwork/colour of body components
- Deviations from the textures and colours in the illustrations are permitted in as far as they are due to the nature of the materials used and/or are usual in the trade. The same applies to technical changes to the vehicle as long as the overall product quality remains the same or is improved, and the intended use is not affected.
- It is possible that inferior-quality clothing can leave marks on the seat covers. This means that the seat covers can become discoloured or the dye from the fabrics can rub off. We do not accept any liability for this kind of discolouration.
- We recommend always using Malibu accessories and having them installed in our factory. We do not accept any liability for damage caused by products that are not approved by Malibu or by non-permitted modifications. This particularly applies to the installation of parts by workshops that are not authorised by Malibu. You should therefore always have repairs or retrofits carried out by authorised Malibu trading partners and insist on genuine Malibu accessories.
- The water supply system complies with the state of the art in accordance with DIN 2001-2.

Publication of this price list renders all previous price lists invalid. Changes may occur during the model year after the editorial deadline for this printed document in July 2024. The manufacturer reserves the right to make structural and design changes that become necessary, provided that they are in the interest of technical progress and are reasonable for the customer, plus changes to equipment, differences in colour combinations or individual colour shades, material quality differences and changes to the scope of delivery on the part of the manufacturer. This also applies to colour differences on basic vehicles, insofar as they are a result of changes made by the basic vehicle manufacturer. Please consult your dealer for detailed advice concerning the status of the current product or series.

The information about the delivery contents, appearance, performance, dimensions and weights of the vehicles (differences within the scope of the factory tolerances (+/- 5% max.) are possible and permissible) corresponds to the available knowledge at the time of going to print. Reprinting of this document, or even extracts thereof, is only permitted if written authorisation is obtained from Malibu GmbH & Co. KG beforehand. The information in this publication is compliant with the German StVO and StVZO (road traffic and road traffic licensing regulations). Mistakes, printing errors and translation errors excepted. All information is based on the characteristics of the German market.
